More information: [Aurora State Airport Master Plan](https://publicproject.net/AuroraAirport) (<https://publicproject.net/AuroraAirport>)

(February 22, 2021)

On Tuesday, March 1, 2022, the Oregon Department of Aviation (ODAV) will hold an online Planning Advisory Committee (PAC) Meeting and Public Open House. These meetings will provide information for stakeholders, community members, and PAC members to learn more about the Airport Master Plan Project.

The Airport Master Plan will create a blueprint for the future development of the airport. The PAC meeting will include a review of the initial data collected by the technical team, and there will be 10 minutes for public comments at the end of the meeting. The Public Open House will provide a background on the Airport Master Plan, what it will include, and the key decision points where the community can provide input.

Accessible Meeting Information

Special accommodations are available upon advanced request. Please contact Sarah Lucas at least 48 hours prior to the event to discuss specific needs.

When: Tuesday, March 1, 2022

PAC Meeting from 3 – 5 p.m.

Public Open House from 5 – 7 p.m.

Where: Webinar or Join by Phone

Please register and join the virtual **PAC meeting** and **Public Open House** by visiting: <https://publicproject.net/AuroraAirport> on the “Public Meetings Page”

An online survey is available on the project website from February 22 through March 25. The survey will collect ideas, comments, and input from airport users and the wider community about the future of the Aurora State Airport.

About the project

An Airport Master Plan is a facility planning study that represents an airport’s “blueprint” or plan for long-term, mid-range and short-term development on the airport. As required by the Federal Aviation Administration, the Aurora State Airport Master Plan will provide specific guidance in making the improvements necessary to maintain a safe and efficient airport that is economically, environmentally,

and socially sustainable. The Airport Master Plan will define the needs of the Airport through a comprehensive evaluation of facilities, conditions, and federal airport planning and design standards. It will also consider what is happening around the Airport that could affect the future plans, development, and operation of the Airport.
