About Animals

Heno has lots of adventures. One of Heno's adventures is about animals. He found an elephant, a lion, a giraffe and a monkey. It was night time so he let them go away. The animals went to sleep and when they were sleeping a big blue monster came. The monster woke the animals up because he yelled, but Heno was still sleeping. The giraffe took the batteries out of the monster's back and the monster went to sleep in Heno's house. He went to sleep on Heno's bed. Heno woke up. The elephant put the batteries back inside the monster. The monster could walk again and took the lion. The monster walked away with the lion. The monster passed the lion back to the other animals after the lion did not want to eat a tree or eat the ground. Heno said, "Thank you, monster, for bringing the lion back." Then the monster was nice. He didn't bite anything or take anything. Heno took the animals back to the forest to live. Heno walked back to his home by the forest.

The End
